

Climate Adaptation Science Center Network

Mission

Delivering science to help fish, wildlife, water, land, and people adapt to a changing climate.

What We Do

Work with **natural and cultural resource managers** to provide science that supports informed decision-making.

Conduct **partnership-driven science** at local, regional, and national scales; from informing community drought preparedness to assessing changes to the Nation's ecosystems.

Leverage **diverse expertise** in climate impacts and adaptation research.
